

SCHOOL PURCHASING GUIDE

2023-
2024

ABOUT THE SCIENCE PENGUIN

Welcome!

For over 11 years, The Science Penguin has connected **TEKS-aligned learning and student engagement**. We provide teachers with ideas, activities, and resources to effectively teach the streamlined Science TEKS while inspiring students through a hands-on, differentiated environment.

We can move **beyond workbooks, textbooks, and seatwork** to inspire students while ensuring they are prepared for STAAR.

Let's work together to help students explore, learn, and experience the wonder of science.

Ari Mosquera, owner of The Science Penguin, is a former 4th and 5th grade teacher who received her MA in Curriculum & Instruction from UTSA. She taught in San Antonio and Austin before moving on to provide professional development and curriculum resources to teachers across the country.

"The Science Penguin is the ONLY resource I have found that is perfectly aligned with the Texas TEKS, professionally done, and allows my students to be actively engaged in their learning. Using The Science Penguin resources helped me increase my school's science scores by 20%!"

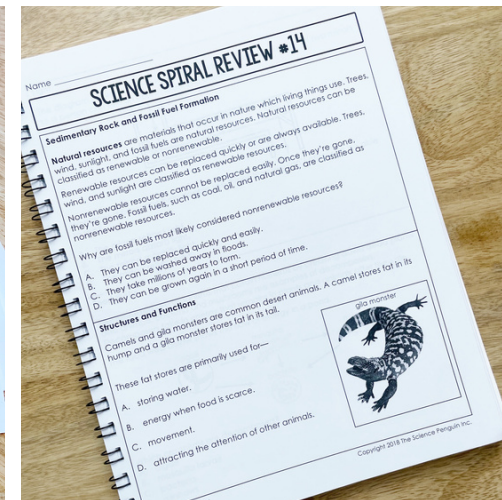

Marissa,
5th Grade Teacher

WHAT WE OFFER

Unlike publishing companies that don't align their textbooks to the TEKS as well as they should, The Science Penguin offers resources designed specifically to help teachers successfully teach each individual Student Expectation. We are up-to-date with the information provided by TEA and take our responsibility to students and teachers very seriously.

The Science Penguin offers subscriptions to three bundles of resources: 3rd grade, 4th grade, and 5th grade. These subscriptions last through June 30, 2024. You only need to buy one grade level license per school.

SCHOOL SUBSCRIPTION

PRICE LIST

5TH GRADE

\$499

Full year of science activities
Planning guides
Accounts for each teacher

- Digital Vocab Lessons
- Notebook Templates
- Picture Dictionary
- Task Cards
- Outdoor Lessons
- Independent Studies
- Digital Inquiry Jr.
- TEKS-based Assessments
- Planning Guides

HAPPY TEACHERS

KATIE, 5TH GRADE TEACHER

Planning for science is so easy with The Science Penguin's TEKS Planning Guides! Each unit is mapped out with high quality materials and explanations on how to teach concepts effectively. From warm ups, to stations, to journals... everything is awesome!

Our scores went up 20% in my 1st year and our school was given a distinction in science. I couldn't have done it without her!

AMY, 4TH GRADE TEACHER

I bought my first The Science Penguin resources in 2013. They energized my lessons, engaged my students, and brought new life in to my class. I can't say enough about her products, from notes to stations to task cards and more; if you aren't using The Science Penguin resources your students are missing out.

VERONICA, 5TH GRADE TEACHER

After 5 years of teaching science, this is the first school year that I feel comfortable dedicating more time to relationship building and making meaningful connections with my students, rather than feeling like I have to spend my time creating material that suits mine and my students' needs, and it is because of Ari, and her amazing and comprehensive 5th grade science bundle.

I trust the quality of her work, and have witnessed that her ideas and products are engaging, rigorous, and prepare my students for far more than just their STAAR tests.

LEGAL & LICENSING

1. The Science Penguin uses a subscription model. Subscriptions are available for the 2023-2024 school year and end June 30, 2024. Please renew your subscription for continued access the following year.
2. You must purchase the correct number of school licenses for the number of schools using each resource.
3. Any resources a teacher acquires due to a purchase made by the campus or district may not be used after June 30, 2024.
